

# Value Methodology Fundamentals 1

Value Methodology Fundamentals 1 (formerly VE Module 1) is a certified course of SAVE International, the international society that governs the content and certification of value practitioners. VMF1 is now a live/ on-line course.

Value Management/ Engineering introduces the concepts, history and many examples of Value Management/ Engineering/ (VM/VE) in practice in the public and private sector.

This course will be of benefit to executive, managers, engineers, project managers and business analysts to determine what types of VE/VM studies would be of benefit to your company. For project managers and technical staff, this course will assist in the capabilities of VM/VE to increase value of the project and minimize the potential of cost over runs, scope creep and extension to project schedules.

## Topics include:

- What Value Management/ Engineering is and what it is not
- History and Applications
- Key success factors of a good VE/VM workshop
- 6 Step Value Management/Engineering structured process
- Workshop (each session will include a mini-workshop to give the participants practical experience in each step of the process)

**Benefits:** Each participant will understand the Value Management/ Engineering structured methodology and will be able to understand how this problem solving methodology can be applied in their workplace. Each participant will be able to be a knowledgeable and effective participant in any Value Management/ Engineering workshops planned by your company.

Upon successful completion of this course, participants are eligible to apply to SAVE International to write an on-line exam to qualify as a Value Methodology Associate (VMA) . Separate exam fees are paid directly to SAVE International. This is the first step to becoming a Certified Value Specialist.

**Duration:** 32 hours

**Location:** Canada (Virtual Course), on-line – live instruction (Eastern Time Zone)

**Date:** September 21-25, 2020, November 2-6<sup>th</sup> and November 16-20<sup>th</sup> 2020.(Please circle requested date)

**Fees:** \$1550.00. CAD ; \$1185.00 USD

## Instructor:

Tom Fletcher P. Eng., CVS is the senior engineering manager of the Fletcher Group, responsible for providing independent Value Engineering services to projects in the construction, transportation, manufacturing, mining, nuclear, business process improvement and automotive sectors. Tom has over 40 years of engineering experience, including 19 years' experience in leading VM/VE workshops and training individuals and corporations in the Value Management/ Engineering Methodology.

Tom was also the Senior Engineer, Value Engineering with the Ontario Ministry of Transportation prior to forming The Fletcher Group

## COMMENTS FROM VMF1 VIRTUAL COURSE; AUGUST 2020

- Shawn, (Ontario, Canada) ; very eye opening, exceeded expectations, looking forward to participating in VM/ VE assignments
- Aniko (Alberta, Canada); Amazing experience, much better understanding of structured VM process and how it can apply to Systems projects. Interested in pursuing VMA and CVS certification
- Alejandro (Florida, USA); Great journey, learned a lot and anxious to apply to current and future projects. Interested in pursuing VMA and CVS certification.
- Mike (Michigan, USA); met expectations, like the structured approach
- Jordan (Ontario, Canada) really understand the Function Analysis process now.
- Steve (Washington State, USA); Much better understanding of the VM/VE process. Will work towards VMA and CVS designation
